Education

Indian Institute of Information Technology and Management, Gwalior *Nov 2022 – May 2027*
Integrated B.Tech and M.Tech in Information Technology

Skills

Languages: C/C++, Python, JavaScript, SQL
Web Development: HTML, CSS, Node.js, MongoDB, Redux
Frameworks: React.js, Next.js, Tailwind CSS, Bootstrap, Express.js, Wasp
Database Systems: MySQL, MongoDB, PostgreSQL
Cloud & DevOps: AWS, Linux, Docker, Kubernetes, Terraform, Ansible, Helm, Argo CD (ArgoCD), Jenkins, CI/CD, Prometheus, Grafana
Tools & Concepts: REST APIs, Git/GitHub, System Design, Microservices, Vercel

Professional Experience

Software Developer *Bangalore, India (Remote)*
GPT Innovations *Sep 2024 – Feb 2025*

- Developed an **interactive frontend dashboard** to visualize and **manage patient files** and extracted medical data, enabling seamless access to critical insights and greatly improving overall operational workflow efficiency BY **60%**.
- Implemented AI-powered voice agents for medical billing pre-authorization, streamlining complex manual workflows using **Twilio** and **OpenAI's intelligent voice agents**, and significantly reducing human errors and callbacks.
- Optimized responsive and high-performing UIs using **React.js** and **Tailwind CSS** by profiling, caching, and refactoring components, resulting in improved user engagement, smoother experiences, and faster page load under **300ms**.

Software Developer *Bangalore, India (Remote)*
Luco Homes *Feb 2024 – Mar 2024*

- Designed a **mobile-first, responsive website** for a pre-engineered homes startup using modern frontend technologies, improving product visibility and driving higher customer engagement through intuitive design.
- Integrated video-based **testimonials and interactive FAQs** with seamless, mobile-friendly playback and smooth content management, enhancing user interaction and improving overall browsing experiences by **35%**.
- Developed an intuitive, **admin-friendly content management interface** for FAQs and testimonials, enabling quick updates without technical help and significantly reducing website maintenance time for business teams.

Projects

AnimeFlix *React.js, Tailwind CSS, Node.js, Socket.IO, MongoDB, Redux* *GitHub*

- Created AnimeFlix, a anime streaming platform with **1,500+ titles**, featuring advanced search, **community posts**, **real-time chat**, and an integrated timetable for upcoming anime episodes with date and time.
- Built a fully responsive, user-focused interface using **React.js** and **Tailwind CSS**, implementing **personalized watch-lists, favorite**s, and sections for trending, upcoming, and popular titles for seamless browsing.
- Enhanced user engagement by integrating **organized anime schedules, intuitive navigation,** and **interactive community features**, boosting engagement by **35%** and delivering a collaborative streaming experience across devices.

Nimbus Cloud *React.js, Tailwind CSS, Node.js, Microservices, PostgreSQL* *GitHub*

- Engineered and deployed a fully **self-hosted**, **end-to-end encrypted cloud storage platform** using **React.js**, **Express**, and **PostgreSQL**, securely exposed via **Cloudflare Tunnels** and hosted on **bare-metal servers**.
- Added **True Zero-Knowledge Encryption** with the **ChaCha20** algorithm, ensuring that even **Metadata** remain fully private to the owner and implemented **LZ4 compression** to reduce file storage size by up to **40%**.
- Produced **enterprise-grade collaboration tools** including **role-based access control**, secure file sharing with revocation, and a real-time **AES-GCM** encrypted chat system supporting teams, direct messages, and group conversations.

Production Kubernetes SRE Platform *AWS, Kubernetes, Terraform, Ansible, ArgoCD, Helm* *GitHub*

- Provisioned reproducible AWS infrastructure using **Terraform** and automated Linux host configuration with **Ansible**, establishing the foundation for production-style Kubernetes workloads.
- Deployed containerized applications on **Kubernetes** using **Helm** and implemented **ArgoCD GitOps** workflows for declarative deployments, configuration management, and application rollbacks.
- Implemented **Prometheus and Grafana** monitoring for cluster and application metrics, defining initial **SLIs/SLOs** and actionable alerts for resource utilization, application errors, and service availability.
